Good design, every stay

We are all designers.

Ones who believe that a beautifully-designed space is only made possible when the art of interior design and the science of furniture sourcing come together.

Today more than ever, people are looking for thoughtfully-designed stays that stand out. Hospitality leaders, on the other hand, are searching for a comprehensive solution that attracts and connects with their guests.

That's why we developed Haus-in-a-Box—everything you need for your property: design, furniture sourcing and installation, staging, and photography. Since we take care of all the heavy lifting, you can spend more time scaling your business.

We believe that quality design has the power to elevate the guest experience and, by extension, boost a property's overall performance.

We invite you to take a look at what we do.
